

## MANAGEMENT COMMITMENT STATEMENT

January 2020

TO: All employees and business partners

FROM: Annie Maples, CEO

SUBJECT: Export Policy Statement

PC COMPONENTS is committed to comply with all relevant domestic and foreign export control laws and regulations.

Export controls affect a high proportion of our business activities, including the sale of products to overseas markets. The purpose of these controls is to limit the supply of technology or strategic goods that could be used for the proliferation of weapons and to conduct business with persons or in countries and sectors targeted by economic and financial sanctions.

We must therefore understand the controls and be certain to comply with them. It is in our interest that the controls are effective as they make the world a safer place. For our business it is essential that we comply with the legislation: failure to do so would incur serious penalties for our company and the individuals concerned.

In conformity with PC COMPONENTS EUROPE policy, all employees must comply with the export control policies and regulations. Under no circumstances will business activities be made contrary to export control rules and regulation by any employee or person operating on behalf of PC COMPONENTS EUROPE.

The Export Control Officer (ECO) is responsible for the oversight of all export control matters and procedures to which we shall adhere.

Each of us must be aware of our own role and ensure that no items are despatched (remember that this term also covers the transmission of software or technology by fax, telephone or other electronic media and arranging to move goods between third countries) without due clearance and authorization. Information is available on how export controls affect your position; please make sure you are aware of it.

We ask each of you to take this matter very seriously and to support us in this effort. If you have any questions concerning the legitimacy of a transaction or potential violations, please contact our Export Control Officer.

*Annie Maples*
